

Project Name: <Project Name>

Introduction:

[What real-world problem are you trying to solve through your proposed project] (100 - 150) words

Features:

[Describe the features that you will have in your project, such as what the users will be able to do with your created program] **(bullet points only)**

Technologies:

[What technologies are you going to use? In this case, this may be java features such as Classes, Arrays, Loops, File IO, Exception Handling, GUI (JavaFX or Swing, but JavaFX is preferred)] **(bullet points only)**

Proposed Timeline:

[Your tentative timeline (in Exact Dates) of showing parts of your project. Regular updates are a great way of showing that you are indeed working on the project, instead of simply popping up on the presentation day and saying you could not do this and that.] **(Table like below, choose your own dates and topic)**

| Date | Update Topic |
|-------------------|---|
| December 15, 2020 | Finalize UML Class Diagram |
| December 24, 2020 | Implement the classes from UML |
| January 05, 2020 | Implement Exception Handling and File I/O |
| January 15, 2020 | Implement GUI and connect the pipeline together |
