

Title: Car Rental Service

Overview:

NSU Car rental service, this application is being used for users to rent vehicles online. User can give his booking date as well as his all personal information. Finally, the application will offer 4 vehicles. After choosing one the application will show the total bill in a transaction receipt. In the whole project we will basically implement Object Oriented Programming (OOP), Graphical User Interface(GUI), File Operation, Abstraction, Interface and so on.

Functional Requirements:

>>USER<<

- ✓ User can enter today's date to check his validity.
- ✓ User can choose rental date and returning date.
- ✓ User can fill customer info page with all his information's.
- ✓ User can choose a car among 4 vehicles.
- ✓ Finally, application will show transaction receipt to the user.

>>TOOLS<<

- ✓ Here we'll use Eclipse IDE to develop the project and JDK: 13.02
